

### Little Ringed Plover *Charadrius dubius*

2005 509–768 pairs. The total of 768 pairs reported in 2005 is the highest ever, but still lower than the population estimate for the UK of 825–1,070 pairs (Gibbons *et al.* 1993).

#### County totals

The number of confirmed breeding pairs and the maximum total of pairs reported to the Panel, by county, are shown in the table below. Zeroes mean no pairs breeding.
